

UC Berkeley Global Science Institute and Weizmann Institute of Science present:

The Olive Fellowship

The Olive Fellowship is a need-based scholarship for Israeli, Palestinian, and Arab undergraduate chemistry students to participate in the Laboratory Research Experience Program (LRE) at UC Berkeley.

Two Fellowships are available for 2019

Fellowship covers the entire LRE tuition (USD \$12,000) and also provides an additional USD \$5,000 stipend to the fellow to cover program-related expenses (travel, visas, accommodation, meals while at Berkeley).

Eligibility

- » Undergraduate chemistry students (sophomore, junior, or senior standing).
- » Citizens of Israel, Palestine, or other Arab countries.
- » First-generation or low-income university students.
- » History of academic achievement in their undergraduate studies.

How To Apply

- » Complete the general [LRE program application](#) first and be accepted to the program.
- » Once accepted, complete the [Olive Fellowship application](#) package, which includes proof of citizenship and personal essays.
- » **Application deadline is February 15, 2019.**

The LRE program is a non-credit bearing summer enrichment program for emerging scholars who seek to learn hands-on about research techniques in a group laboratory setting. Through this program, you will learn to think independently, process advanced chemistry concepts and apply chemical theory, effectively communicate and substantiate your ideas to others, and build group dynamic skills while being mentored through various research modules.
